Planting Trees

THE first thing is to break the land good and deep. Check twenty feet each way. That is the best distance to plant where one plants different kinds in the same orchard so that you can cultivate both ways. Plums can be planted closer when set to themselves. Dig hole so that the roots are not cramped, but stand out in natural position; set as deep as the tree grew in the nursery row and when the hole is nearly full of dirt, pour in some water and when it settles put on more dirt and tramp until dirt is firm around the roots, and then put a little loose dirt on to prevent baking and cracking. Fruit trees should be cut off eighteen inches above the ground; let them branch as low as they will, just so you keep sprouts off below the bud, which is usually about four inches above the ground. When trimming trees in years to follow, bear in mind and be sure not to cut off the low limbs that shade the body of the tree, but shorten in the limbs so as to make the tree well shaped and bushy, some of the inside twigs may be taken out, but not enough to allow the sun to burn the limbs.

The orchard should be plowed as deep as you can without tearing up the roots, once each spring, and then shallow cultivation; don't hill up around the trees; keep the ground level. Cultivate after every rain during the summer months. Grapes should be planted six to eight feet in rows and rows eight feet apart. Leave two vines three or four feet long first year and trim side shoots back to two eyes of new growth each year. Plant blackberries eight feet apart and two and a half feet in the row, and when the young shoots are three feet high, pinch out the tips so as to make them branch out. Take out all dead canes. Dewberries should be planted in rows six feet apart and two and a half feet in the rows.

INDEXED.

This catalogue is our agent. We don't have any traveling agents. Send your order to the Nursery and get what you want, and at the time you want to plant, so as to get them out in good order.

We can sell some cheaper by selling direct to the planter and saving the expense of agents. If you are not sure of the varieties you want to plant, if you will state for what purpose, home use or for market, we can make a splendid selection, as we have had thirty years' experience in the fruit business and take pride in doing the best we can for our customers. We have increased our plant and we are in a better shape to supply our customers with both trees and flowers of the very best varieties; of pot plants, cut flowers in their seasons, through the whole year, and a fine assortment of both fruit and shade trees.

Give us a trial. We still have some customers that were among the first to patronize us, nearly thirty years ago.

Guarantee

We guarantee our trees to be true to name and in a healthy condition, and should we make a mistake, as we all do, sometimes, we will replace the tree free of charge or refund amount paid, but will not be liable for a greater amount.

Inspection

We have inspection certificates from both Texas and Oklahoma, showing that we have complied with the law and that our trees are in a healthy condition, one of which will accompany each order.

Substitution

Sometimes varieties called for have given out, and in such cases we put in the best we have to fill its place, unless requested not to do so.

Prepayment

We will prepay freight or express to any railroad, freight or express office in Texas or Oklahoma, where bills amount to Five Dollars or more. This applies to trees and pot plants. But they must not be mixed, as we pack them separate. This does not apply to plants in pots nor evergreens with balls of dirt on the roots, or bulbs or cut flowers.

Terms, cash with order.

Wichita Nursery & Floral Co.

The Golden Harvest

Fruit Department

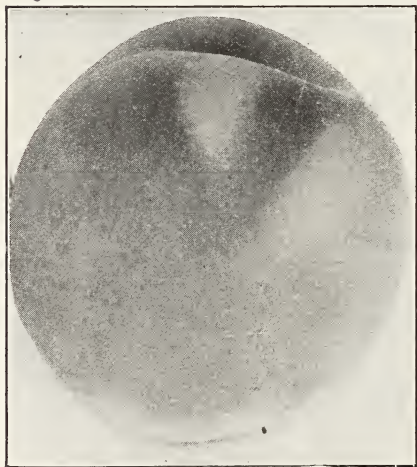

Peaches

Our aim is to grow the very best selected assortment of peaches, ripening in succession from May till frost. We are always testing some new varieties and when we find good ones, we add them to our list and discard the ones that are not so good. When planting, see that the ground is well broken, the deeper the better. Dig holes large enough not to cramp the roots. Set very little deeper than they were in nursery; sometimes trees are planted too deep. When hole is nearly full, pour in some water, put in some dry dirt, tramp firmly and put a little loose dirt on top to prevent baking.

Prices, except where noted:

2 to 3 ft., 15c each, \$8.00 per 100; 3 to 6 ft., 20c each, \$15.00 per 100

We name them in about the order of ripening, from early to late.

Mayflower

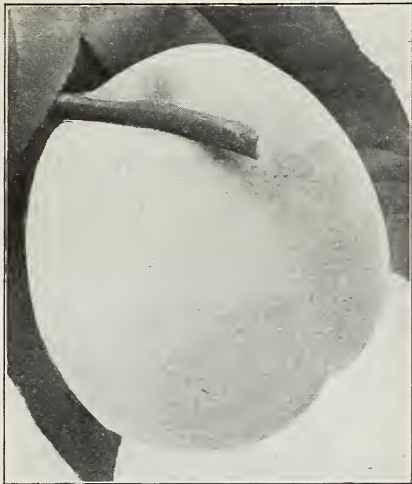

Mayflower. The earliest peach known. Originated in North Carolina. It is not as large as Sneed, but is more highly colored, being a deep red, and is valuable on account of its earliness. 50c each.

Sneed. This is one of the very best early peaches, being large in size, white with red cheek, and is a good bearer, and you will make no mistake by planting a few Sneed.

Victor. Not as large as the Sneed, but a better shipping peach. Color dark red. Sells well, as it is a very pretty peach.

Alexander. The old reliable early peach. Very productive and seldom fails to bear good crops of fruit;

color greenish yellow, nearly covered with red; blooms late.

Elberta

Admiral Dewey. A new peach of large size, freestone, color yellow, good quality, fine appearance. Bears well. Price, 25c each.

Triumph. An early yellow freestone peach, highly colored, of fine quality, and one of the earliest yellow peaches.

Mamie Ross. This is one of the very best peaches grown, both for market and home use; shape oblong, white with red cheek. This peach is planted largely for market purposes, and we feel that we can hardly say enough in its praise.

Arp Beauty. A new yellow freestone peach; resembles Elberta, but is earlier quality; good, and is becoming a very popular peach. Price, 25c each.

Carman. This peach looks very much like the Mamie Ross, but is a little later, large size, quality the best; freestone; white with blush on cheek. Sure bearer. Don't fail to plant some of this peach.

Champion. Here comes one of the best eating peaches of all; cream color, with red cheek, freestone, large size and fine appearance.

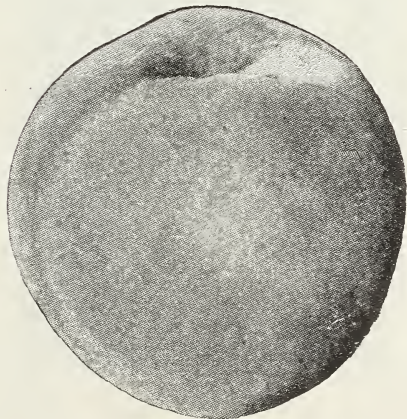

Elberta. The great market peach; fine for canning; very large, yellow freestone. The most popular peach grown, and will sell on any market on account of its fine appearance.

Elberta Cling. A large clingstone peach, like Elberta, but, being a cling makes it a very valuable addition to the peach family.

General Lee. This is one of the very best peaches grown, a cling of large size, best quality, fine appearance; white with beautiful red cheek, very productive, often too large to go in jars for pickles. Ripe August 1st to 15th.

Indian Cling. An old and well-known variety, very hardy; color red clear through to seed. Ripens in August.

Old Mixon Cling. Large, white, with pink cheek; sweet and firm fine for sweet pickles. Ripe in August.

General Lee

Heath Cling. Creamy white, firm and sweet. Fine for pickles, and will

keep for days after being gathered. Ripe in September.

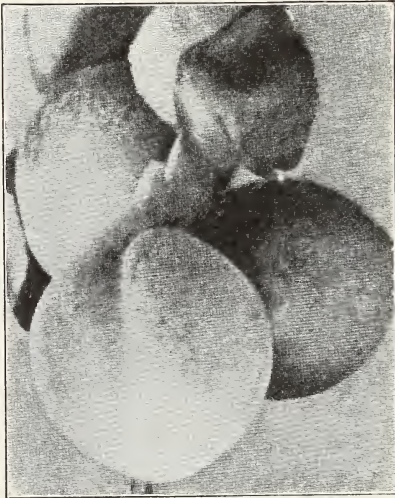

Salway. Yellow freestone of good size. Quality good, good for home and market purposes. Ripe in September.

Stinson's October. Large, white, with red on one cheek, juicy and of good quality. Ripe in October.

Apricots

25 Cents Each

The apricot is a fast-growing tree and makes a good yard tree. They sometimes bloom too early. We are growing the kinds that have proven best here, and are least liable to be killed by frost, and that bear fine crops of fruit.

Cluster Apricot

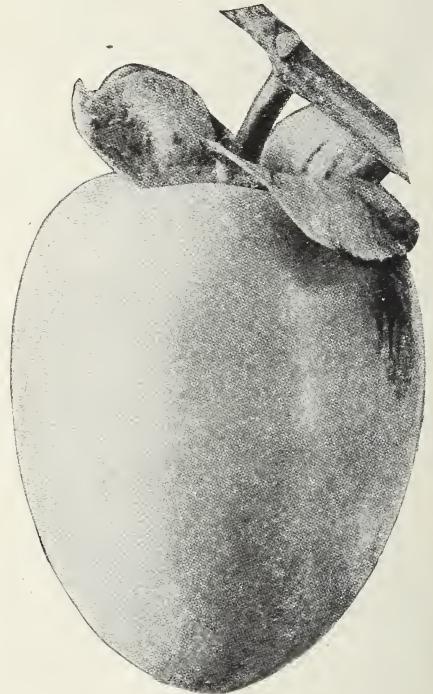

Early Golden. So far this has proved to be the best bearing variety of any of the apricots we have

tried. Large, golden yellow, and has a splendid sweet flavor.

Cluster. Upright growth, bears in clusters; not so large as the Early Golden.

Persimmons

Japan Persimmons. Are very large and there are quite a number of dif-

Japan Persimmon

ferent varieties. Some of them have yellow meat and some of them have dark meat and are very sweet, even before they are soft. 50c each.

Native Permisson. Not so large as the Japan Persimmon, but are hard to beat, when it comes to flavor. 25c and 50c each.

Burbank

Plums

25 Cents Each

This is a splendid country for plums. They grow wild along the streams and, of course, when cultivated, they do still better. We have tested lots of different kinds, and we are offering the ones that have done best here.

Botan. One of the best flavored of all the Japan plums: large size, yellow meat, with red cheek.

Burbank. Japan. Red, with yellow meat, abundant bearer. It sometimes breaks under its load of fruit.

Golden Beauty. Bright yellow, blooms late and rarely ever gets killed by frost. This plum does best on sandy land, or where it can be irrigated. Ripe September.

Gonzalos. Brilliant red, good size, fine quality, juicy; immensely productive. The Gonzalos is a cross between the Chickasaw and the Japan plums.

Eagle. Our surest and most profitable plum. We have never had an entire failure with this plum. It is the best we have grown, both for quality and quantity. Medium size, pale red when fully ripe, and can be gathered for six weeks.

Red June. Japan, large, purple, yellow flesh, ripens early. Good for market. A large, showy plum.

Wild Goose. Large, red, of best quality, and when planted near the Eagle it bears full crops of fruit regularly.

America. Japan. Medium size, yellow, a good bearer. This is a new plum.

Bartlett

Pears

25 Cents Each

Bartlett. One of the best eating of all pears. Buttery, fine flavor.

Early Harvest. Medium size. Yellow. Good quality. Valuable on account of its earliness.

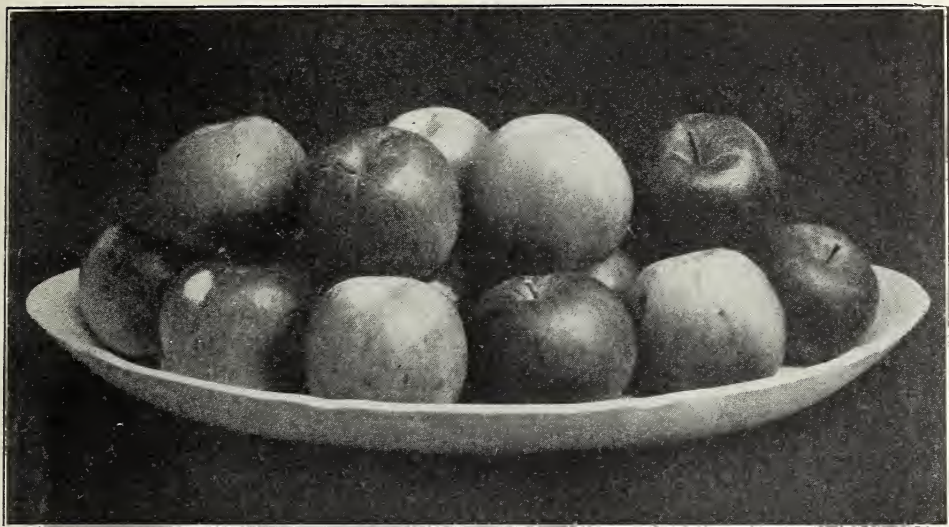

Garber. Similar to the Kieffer, but earlier and better quality, is a rank grower. One of the best pears for this country.

Kieffer. This is our best and choicest pears for this section of country. They are bearing large crops of fine fruit. Gather them when they are yellow, and put in house or dugout, and they will ripen up and be fine eating.

Le Conte. Very large, pale yellow. Ripens July.

Kieffer

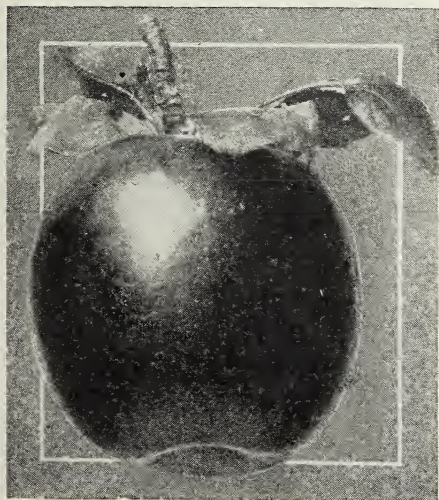

Early Harvest

Apples

25 Cents Each, \$18.00 per 100

So far apples have not done very well here, as a general thing, but there are some trees bearing nicely in this locality. Don't plant where cotton dies or potatoes rot.

Jonathan

Red Astrachan. The best June apple for this section of country. Red, acid and of vigorous growth.

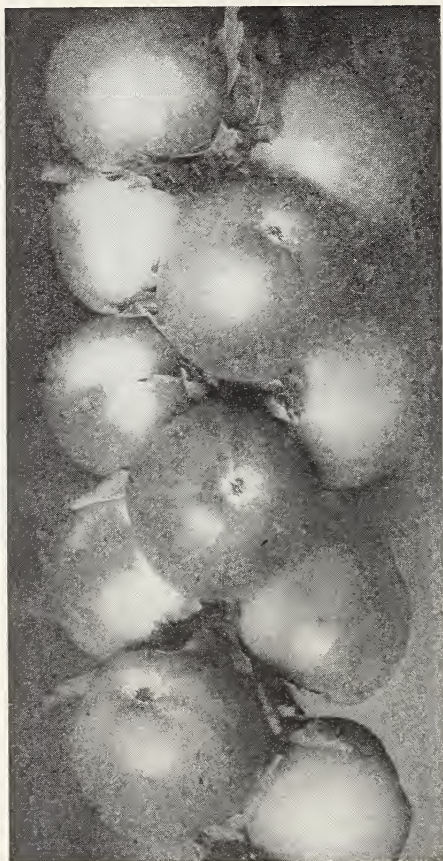

Early Harvest. A fine early apple of good quality and good size. A fine cooking apple.

Summer Queen. Yellow, with red stripes, a good eating apple.

Winesap. Medium, red, fine flavor and a good eating apple; ripe in fall.

Ben Davis. Large, red striped, very hardy and one of the most popular of all fall and winter apples.

Jonathan. Bright red, vigorous growth, and of the best quality. A fine keeper for winter use.

Transcendent Crab

Crab Apples

25 Cents Each

The crab apple is very hardy and comes into bearing young. They are fine for sauce, cider and preserves.

Transcendent. Striped with red, flesh yellowish.

Whitney. Green, striped with red.

Mulberries

Hicks' Everbearing. A rapid growing tree. Makes a good shade and bears three or four months. 25c each.

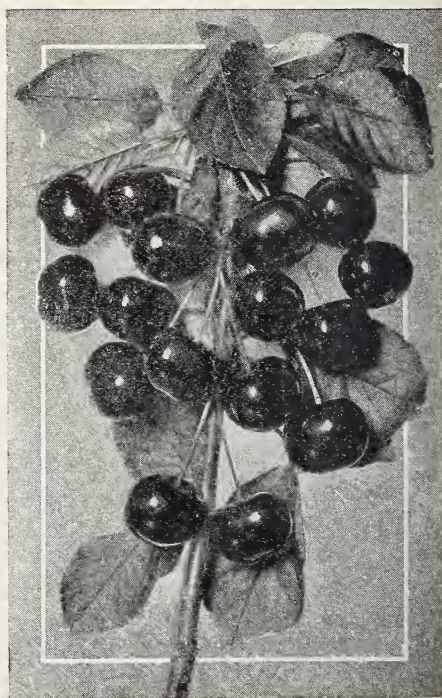

Russian. This is one of the very hardiest Mulberries we know of. It is grown from seed and the fruit varies in color from white to black. This is one of the best shade trees for west Texas. 15c, 25c and 50c each.

Cherries

25 Cents Each

Early Richmond. Bright red, one of the most reliable kinds.

English Morello. Dark red, later than Early Richmond.

Early Richmond

Dallas

Blackberries

The blackberries are very hardy and easy to grow, and are profitable, both for home and market. Seldom fail to bear.

Dallas. Medium early. Large size and the best quality. A good kind to grow. 40c per dozen, \$2.00 per 100.

Robinson. A new berry; very large. It begins to ripen with the Dallas and continues bearing for a long time. This berry is a good shipping berry, being firm. 50c per doz., \$3.00 per 100.

McDonald. This is another new berry. A cross between the black-

berry and the dewberry, and is prolific, but must be planted near other kinds of berries to make it bear. 50c per doz., \$3.00 per 100.

Dewberries

Mays or Austin. The best of all dewberries. It is very productive, large, and it is one of our best paying crops. 40c per doz., \$2.00 per 100.

Delaware

Grapes

The grape is something of which everyone should have at least a few plants, as they take but a small space to grow them. They come into bearing young and bear large crops of fine fruit.

Price, except where noted, 10 Cents Each, \$8.00 per 100

Concord

Concord. The old reliable. It is hardy and grows most anywhere, and on most any kind of soil.

Delaware. A small red grape, very sweet and a good table grape.

Herbermont. Very strong growth, large bunches of small berries. Black and very juicy and is good for wine.

Moore's Diamond. An early white grape. Very productive, nice, compact bunches of good quality. 15c each.

Niagara. Large, white, good for table or market.

Black Spanish. Larger than the Herbermont, and is one of the best to bear of any of the grapes we have tried.

Brilliant. Large, red, of fine quality. 15c each.

Strawberry Field

Strawberries

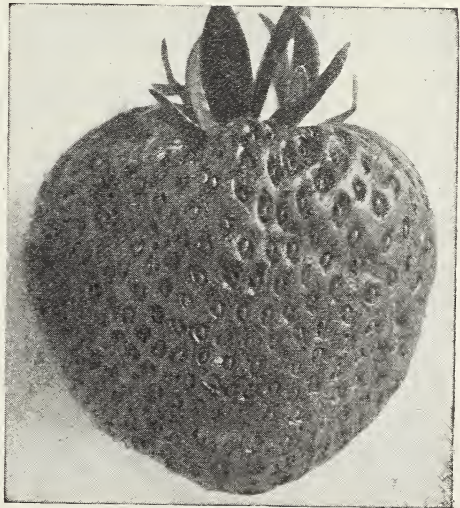

Lady Thompson. This is our favorite berry. It begins to bear right after the earliest and continues for a long time. Large size.

Klondike. One of the best shipping berries. Dark red, of fine appearance.

Gandy. Very large, beautiful berries; one of the best late berries.

Aroma. Another large, late berry, of fine appearance.

The strawberry is one of the best paying crops one can plant. Try at least a small patch; they make more to the space than anything you can plant. 75c per 100.

Lady Thompson

Ornamental Department **Shade and Ornamental Trees**

Prices, except where noted, 4 ft., 15c; 6 ft., 25c; 8 ft., 50c Each

Alanthus. Very hardy, will grow on most any kind of soil.

Ash. The Ash is a native tree and makes a good shade.

Black Locust. Rapid growth, good for shade, but will not do well where there is any root rot in the soil.

Black Walnut. The black walnut is proving to be one of our best shade trees; nice shape and good foliage. 4 ft., 25c.

Bois de Arc. Very hardy and will grow under most any circumstances.

Box Elder. A fine shade tree, of pretty form and fast growth.

Carolina Poplar. This is a fast-growing tree, is of a pretty shape, and makes a good shade.

Lombardy Poplar. Ornamental, upright growth.

Pecans. Every home should have at least one Pecan tree. Trees have

borne over \$100 worth of nuts to the tree in a single season. The pecan is rather slow growth at first, but soon makes fine shade. We have the seedlings from the finest native seed we could get at 25c and 50c each.

Grafted and budded varieties, Stewart & Vandeman, \$1.00 to \$1.50 each.

Catalpa. The catalpa is not planted as much as it should be. It is a very hardy tree and is seldom bothered by insects. It stands drouth well, and has pretty white flowers, and is used in some places for post timber.

Elm. One of the prettiest of all shade trees. Hardy and makes a beautiful ornamental shade tree.

Hackberry. This tree will stand almost any kind of treatment, after once started. It is being used for street planting.

Red Bud or Judas Tree. Has clusters of pale red flowers early in the spring, and is a very hardy ornamental tree.

Soft Maple. A beautiful shade tree of rapid growth; good for yard or street planting.

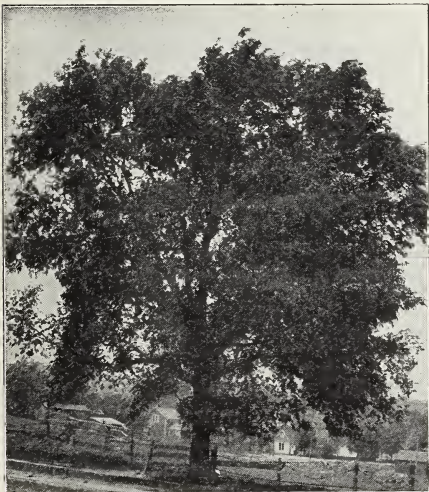

Soft Maple

Sycamore. The most popular tree for street planting, hardy, with broad leaves, and is not nearly so apt to be bothered by borers as the hackberry and some of the other shade trees. The sycamore has a beautiful shape and grows to be very large.

Weeping Willow. Does best in a moist place, and is a pretty weeping tree of rapid growth.

White or Native China. This is one of the hardiest trees we know of. It will grow on most any soil, and after once started it will grow with very little care. When in bloom it is very pretty; also when the berries or seeds turn to a golden color in the fall, a tree of medium size and nice shape.

Umbrella China. A rapid growing tree, with umbrella shaped top; has dark green foliage, and makes one of the quickest shades of any of the shade trees.

Elm

Evergreens

One foot high, 25c; 2 feet, 50c Each

We have tried lots of different kinds of evergreens, and have the following kinds that have done best here. We take them up with balls of dirt, and sack each one separately. Set them out sack and all, just as we send them to you.

Arbor-Vitae, Chinese. Some of this kind are very compact and others are of a more open growth and make a larger tree.

Arbor-Vitae, Compacta. A close, compact growth, always a pretty shape.

Arbor-Vitae, Pyramidal, Golden. Upright, pyramidal shape, with a beautiful golden yellowish color.

California Privet. This is the best hedge for yard fence, almost an evergreen. \$3.00 per 100 and up, according to size.

Cedrus Deodora. A beautiful evergreen of a light pea green color. 50c to 75c each.

Euonymus Japonica. Has round leaves of a dark green color, and makes a good, pretty hedge, as well as being ornamental as single specimen. 25c to 50c each.

Magnolia. This is a broad-leaved evergreen, with a glossy green color and has beautiful white flowers. 50c each.

Red Cedar. The old, reliable evergreen. Can be trimmed in any shape you wish.

Rosedale. A beautiful evergreen of compact growth and a pea green color and very ornamental.

Rosedale

Flowering Shrubs

25 Cents Each

Althea. A shrub or small tree, some of them have white, some pink and purple flowers, resembling the hollyhock.

Flowering Willow. White and purple. A splendid flowering tree.

Crape Myrtle. Red and pink, a hardy shrub, covered with flowers in mid-summer; very pretty, sometimes gets to be fifteen feet high.

Deutzia. A shrub with tassel-like white flower, tinged with pink, and blooms early in the spring.

Salvia Greegi. A new shrub from southwest Texas; very hardy; will stand both cold and drouth; has red flowers and is everblooming. This is certainly a fine addition to list of shrubs. Field-grown plants, \$1.00 each.

This plant grows to be three or four feet high and three to four feet wide, and is mass of red flowers.

Japonica. A very hardy shrub, will grow with very little care and on almost any soil; flowers trumpet shaped and of a bright red color. Blooms early.

Lilac. We have the Persian purple; large blooms.

Lilac, White. Strong plants, two and three years old.

Lilac, Common Purple. Very hardy and easy to grow.

Poinciana. This is one of the hardest of shrubs, will grow right in the grass; yellow blooms, with long, red stamens, sometimes called parrot's feather.

Althea

Ever-Blooming Roses

Except where noted, one-year field-grown, 25c; two-year-old. 50c each.

These are strong plants, and not to be compared to pot plants.

The rose is the most popular flower for summer blooming and gives more blooms throughout the season than most any other flower. By planting the ever-blooming varieties one can have them in bloom from early spring till frost. We have tested lots of different kinds, and are trying to grow the ones that have done best here. You will find this a fine collection of all colors.

Agripena. Dark red, velvety rose. Strong growth, very hardy.

American Beauty. A very large red rose. One of the finest roses that grows. Very fragrant, and brings the highest price as cut flower; long, stiff stems. 50c each.

Baby Rambler. A new dwarf everblooming crimson rose; blooms in clusters. 35c each.

Bride. White, with tint of pink when grown outside. Has beautiful buds, and is a very hardy rose.

Bridesmaid. Light pink, of rank growth and a profuse bloomer; hardy and easy to grow.

Etoile de Lyon. Cream color; has fine foliage, and is our best cream rose; has large buds.

Kaiserin. Large white, with beautiful pointed buds. This is one of the best roses we know of, and you will make no mistake when you plant this rose.

La France. Silver pink, noted for its fine buds, and gives splendid sat-

isfaction here. No collection is complete without the pink La France.

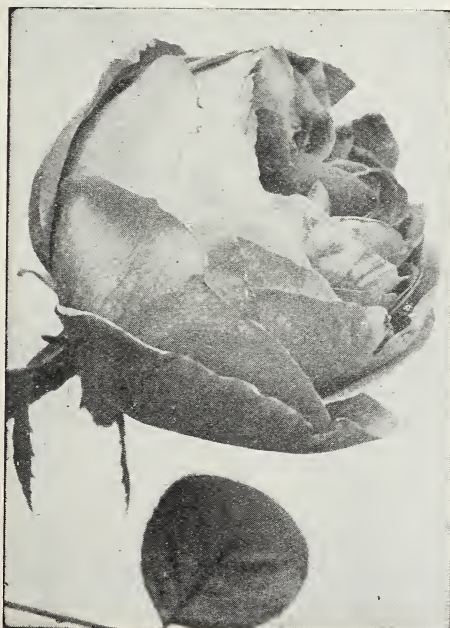

Marie Vanhoutte. Straw yellow outer petals, tinged with pink. Grows vigorously and is a profuse bloomer.

Meteor. Dark red, hardy, a good rose for this country. One that we are well pleased with as a red rose.

Pink Striped. Soft pink with blotches of white, and is a very pretty rose; strong growth and very hardy.

Etoile de France. * Large, beautiful light or bright red. This is one of the most beautiful and attractive roses, being a bright glowing red.

Paul Neyron. This is one of the largest of all roses; color light pink, on the order of the American Beauty.

Paul Neyron

Catherine Soupert

Teplitz. Dark, velvety red, very showy, and one of the hardiest for yard planting.

White Cochet. White, changing to pink. Large, pointed buds, curving outward. This rose is hard to beat, being one of the best that grows.

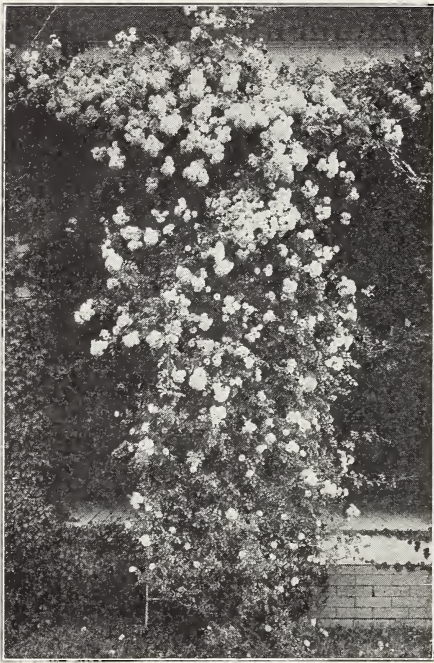

Bessie Brown. Large buds of the most delicate pink one can imagine, and is certainly a beauty.

White La France. Upright growth very much like the pink La France.

Catherine Soupert. White, tinted with pink; a profuse bloomer; good for cemetery planting. Very hardy.

Pernet's Triumph. Deep pink or light red; strong stems; large buds and a very pretty rose.

In the early spring we have small plants of the above varieties of roses at 10c and 15c each, \$1.00 to \$1.50 per dozen.

Crimson Rambler

Climbing Roses

Climbing Soupert. White, with pink tint, and a strong grower, and is everblooming.

Climbing Meteor. Dark, velvety red. This is one of the best red climbing roses.

Climbing Kaiserin. Large, creamy white, very large, fine buds. This rose is hardier than the Marechal Niel, and does better here.

Climbing Marie Gillott. White, with large flowers, strong growth.

Empress of China. A very rank growing climbing rose; light pink.

Crimson Rambler. This is not an everblooming rose, but is very pretty, as it blooms in clusters of the most brilliant red.

White Washington. Pure white blooms, in clusters, and is a good rose for cemetery planting.

Climbing Vines

25 Cents Each

Ampelopsis Vetchii. A vine that will cling to walls; it makes a pretty vine.

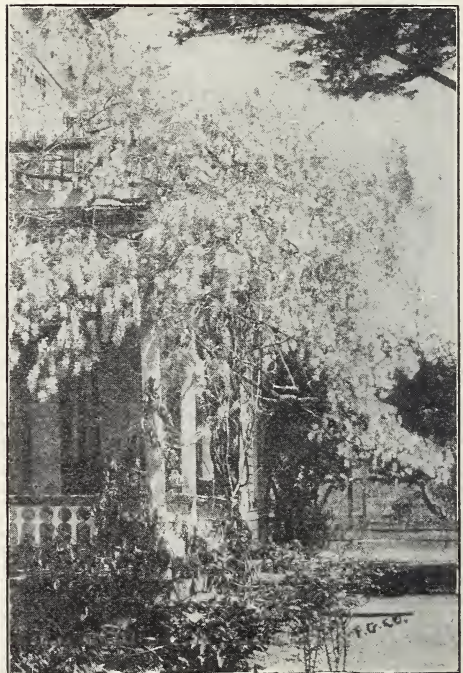

Coral Honeysuckle. Red trumpet-shaped flowers, very hardy.

Hall's Japan Honeysuckle. Evergreen; fragrant, with white and yellow flowers. This is one of the very best honeysuckles.

Wisteria. A rapid-growing vine, with large bunches of purple flowers.

Kudzu Vine. This is one of the most rapid-growing vines we know of. It will grow fifty feet in one season. 35c each.

Trumpet Vine. Very hardy, with trumpet-shaped red flowers. Once started, you always have a vine, if it is given any chance at all.

Wisteria

Greenhouse Department

We have just added another large house, making six in all, besides some propagating beds with sash, where we grow thousands of plants, and with our increased facilities, it puts us in shape to handle the plant and cut-flower business better than ever. We try to grow the best of everything the trade demands, both in cut flowers and pot plants.

Bulbs

We carry a full line of the best bulbs for winter blooming. These are ready in the fall, in time for planting. They require very little care, and bloom in a short time.

Early Roman Hyacinths. These give several flower stalks from each bulb, and are nice planted several in a pot. They bloom early and are sweetly fragrant, pure white. 5c each, 50c per dozen.

Easter Lilies. This is a very popular bulb and is in demand for Easter flowers. 25c each.

Calla Lilies. This kind has beautiful broad, glossy green leaves and large, beautiful white, waxy flowers, and is an attractive plant. Bulbs, 25c to 35c each.

Freesia. A very fragrant cream-white flower, growing several on a stem. Six or eight may be planted in a six-inch pot. 25c per dozen.

Hyacinths. Large, double, of all colors, white, red, pink, yellow and blue. 15c each, \$1.25 per dozen.

Hyacinths, Large, Single. Yellow, red, white, blue and pink. 10c each, 65c per dozen.

Narcissus. Paper white. This is one of the most popular bulbs grown. It can either be grown in

Narcissus, Von Sein. Double yellow, large flowers and very pretty. 5c each, 40c per dozen.

Trumpet Major. Single yellow Narcissus. 5c each, 35c per dozen. dirt or gravel and water. Blooms early. 5c each, 35c per dozen.

Narcissus

Ferns

There are few plants that give more pleasure than the different kinds of ferns. They are good any time of the year. We have a large assortment of different kinds and sizes.

Asparagus Plumosus. Fine foliage, of spreading habit and beautiful form. 15c, 25c and 50c each.

Asparagus Sprengerii. A very hardy and desirable fern of strong growth; this fern hangs down and is fine for hanging baskets. 15c, 25c and 50c each.

Boston Fern. The most popular of the sword ferns. It gets to be very large, of handsome form, and is easy to grow and is a valuable addition to any collection of flowers. 15c to \$3.00 each.

Pearsoni. A fine rank-growing notched leaved fern. This is a very attractive fern, one that we believe

you would be pleased with. 15c to \$3.00 each. Of this and the Boston we have a very fine lot of plants at 50c, 75c and \$1.00 each.

Whitmani. A beautiful form of the sword fern, with finely notched leaves; one of the best of the ostrich-plume type, and one of the handsomest of all ferns. 35c, 50c, 75c and \$1.00 each.

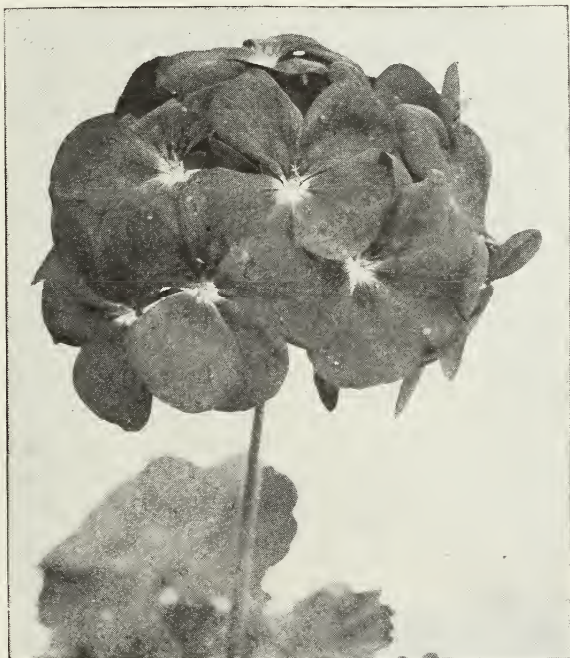

Compact Sword. This fern is of an upright growth, with dark green foliage, and is nice in a collection, as it is quite different from the other ferns. 25c to 50c each.

Roosevelt Fern. Similar to Boston, but the leaves are more kinky or inclined to curl. 25c to 50c each.

Geraniums

The Geranium is one of the easiest pot plants to grow. They bloom nearly all the time and are one of the best house plants. We have the small plants, 10 cents each, \$1.00 per dozen, for yard planting in the spring.

Larger plants, 25c to 50c each

General Grant

General Grant. This is one of the hardiest of all the Geraniums. It will stand more heat and do better in the yard than most other kinds. Red.

Countess de Harcourt. A fine, pure white.

S. A. Nutt. Color rich, dark red. One of the most popular of all geraniums, fine for either pot culture or planting in the yard.

Jean Veaud. A clear, soft, rosy pink; strong growth and very large clusters of beautiful flowers.

Poet Vine. Color a beautiful salmon pink, with dark-zoned leaves; and a splendid bloomer.

Richard. Zoned leaves and large, soft red blooms. This is a strong-growing geranium.

Rose Geranium. This is one of the scented varieties, with small pink flowers. 10c to 25c each.

Ivy Geraniums. Of different colors. 15c to 25c each.

Pellagoniums or Pansy-Blossomed Geraniums. 15c to 25c each.

Chrysanthemums

This is the most popular fall blooming plant, and when given care, they grow to immense size and of the most gorgeous colors. We have a fine collection, including all colors.

10 Cents Each, \$1.00 Per Dozen, except where noted

O. P. Basset. Pale yellow, incurved petals. Very pretty.

Golden Glow. Deep golden yellow, very large and showy. 15c each.

Wm. Duckham. Large, incurved, pink. This is one of our very best pinks.

Dr. Engenhard. Deep pink, very, large, incurved, late bloomer.

Robisin. White with beautiful incurved petals. This is a large flower and is one of the very best white chrysanthemums.

Blackhawk. Very large, beautiful dark velvety red flowers. 15c.

Yellow Pompom. Very double, golden yellow.

Robisin

Single White. Blooms early and looks like large daisies.

Kolb. Large, early, white, with incurved petals; strong stems.

White Pompom. This kind is not a large variety, but is very double and pretty, and should be in every collection.

Glorie Pacific. A free-blooming white, and is a very desirable kind.

J. K. Shaw. Beautiful shell pink, and is a strong grower.

Hallida. One of the best yellow varieties, of large size.

Lantanas. We have found these plants to be a very satisfactory plant for summer bedding; they are free bloomers, covered with beautiful flowers all summer long, and have a good range of colors. 10c, 15c and 25c each.

Begonias. 10c, 15c and 25c each.

Albapicta. Slender pointed leaves, specked with white, like snow, with clusters of greenish-white flowers.

Gracilis Luminoso. Large leaves, red on under side, with green and white blotches on top, large red flowers. Rank growth.

Rubra. Upright growth, with elephant-ear shaped leaves and large clusters of red flowers.

White Begonia. This is the hardiest of begonias, a profuse bloomer with glossy green leaves.

Cannas

10 Cents Each, \$1.00 per Dozen

The Canna is one of the very best bedding plants where quick effect is wanted, being very easy to grow, and there are so many beautiful shades of blooms with the green and bronze foliage; besides they look so thrifty and fresh it makes them desirable for beds or to plant along the fence.

Burbank. Yellow, slightly speckled, changing to almost white.

Wyoming. Bronze colored leaves, and orange colored blooms.

Chas. Henderson. Dwarf, with immense red flowers.

Pennsylvania. Strong growth, with very large, soft red flowers.

Mexican Tuberose. This is one of our best summer blooming flowers, pure white, wax-like flowers on long, stiff stems. 75c per dozen bulbs.

Burbank

Asparagus

This is one of the best of all early vegetables that grow, and is a sure crop every year after once getting started; a bed will last a lifetime. In making the beds, plant two rows two feet each way, about four inches deep; make the ground very rich; hill up so as to cut six inches underground. A dressing of salt is good for asparagus beds. \$1.00 per 100.

Rhubarb or Pie Plant

Rhubarb is used for making pies, and is something very nice to have in the garden. The roots will need something to shade the ground in the hot part of the summer. 15c each; two for 25c.

Pecans

Don't fail to plant a few budded or grafted Pecans and take care of them, and you will not only have nice shade trees, but have some of the finest nuts that can be produced.

Cut Flowers

The cut flower department is getting to be one of the largest parts of our business. We are continually adding to it in every way that we can, to keep up with the times, and have everything up to date.

Our shipping facilities are good, and we take pains to pack well. We send both by express and parcel post. If by post, add enough for postage.

Usual prices on cut flowers are as follows. But on holidays, such as Easter, Christmas and Mother's Day, prices are usually from one-third to one-half higher. All orders not accompanied with cash or satisfactory reference will be sent C. O. D.

Carnations. \$1.00 per dozen.

Roses. \$1.00 to \$5.00 per dozen.

Chrysanthemums. \$1.00 to \$3.00 per dozen. October 25 to December 20.
